

Welcome to our fourth issue of the monthly Newsletter from Vibration-test.co.uk, the Engineering portal for all R&D, Test and Product Lifecycle information.

To register for the Newsletter or to send your relevant information, links, exhibition dates or papers to us send it by email to [info@vibration-test.co.uk](mailto:info@vibration-test.co.uk)

[www.vibration-test.co.uk](http://www.vibration-test.co.uk) will be continually developed and updated, help us make it the resource it should be.

**New registrations for the Newsletter in September will be entered into a draw for a Bottle of Bollinger Champagne, just a few weeks to go, Register Now!!**

### Contents

**News:** The latest info from the UK Test & Measurement industry

**Exhibition News:** Events in the next few weeks

**Useful Links:** Some Weblinks to useful sites

**Training:** Future training Courses

**Thought for the Day**

### News for September 2008:

**News from Dataphysics UK Ltd** [www.dataphysics.com](http://www.dataphysics.com)

SignalCalc Turbo is a new portable data acquisition and analysis system for rotating machines with a special emphasis on machines with journal bearings. Packed with powerful measurement functions, it is ready to tackle every rotating machinery diagnostic problem encountered in the power generation, oil and gas, energy and industrial sectors.

**News from m+p international (UK) Ltd** [www.mpihome.com](http://www.mpihome.com)

Noise & Vibration Analysis: SO Analyzer with New Software and Hardware. The SO Analyzer is m+p international's versatile real-time analyser for noise and vibration measurement, analysis and reporting in the field and in the lab. It is scalable and offers modules for signal processing and time data recording, modal analysis, impact testing, rotating machinery, acoustic analysis, environmental testing analysis as well as for vehicle pass-by-noise testing

News from Calibration Maintenance and Repair Ltd [www.cmr-vib.co.uk](http://www.cmr-vib.co.uk)

Calibration, Maintenance and Repair Ltd announce the release of a revolutionary vibration analyser, The A4900-Vibro III is a Vibration Analyser with a revolutionary design at a cost effective price. Not only does it measure total vibration, it also displays FFT spectra and time records. It's 'traffic light' system of coloured vibration levels allows potential problems to be identified quickly and easily, saving on costly down time. Download Full Release [CMR News](#)

## Exhibition News:

**Northern Manufacturing 2008**, 1-2 October 2008 Hallam FM Arena, Sheffield, visit [www.industry.co.uk](http://www.industry.co.uk)

**Manufacturing Technology Ireland 2008** 5-6 November 2008 National Show Centre, Dublin, visit [www.industry.co.uk](http://www.industry.co.uk)

**North West Maintenance 2008**, 19-20 November, Old Trafford, Manchester [www.maintenanceonline.org](http://www.maintenanceonline.org)

## Useful Weblinks:

[Efunda](#) - Extensive online engineering, maths and physics reference guide

## Training:

**'Commercial Awareness' - Thursday 9 October 2008**

**Cost £160+vat per person inc. Refreshments, Lunch and Full course notes (discount offer £140+vat per person for bookings of 2 or more) payment required with booking.**

**Venue - Conference & Development Centre, Bedford, Bedfordshire**

**WHO SHOULD ATTEND THIS COURSE** - Attendees to benefit would be graduates, junior & middle management whose experience and qualifications are in a technical or scientific discipline but who need knowledge of Commerce/Business to successfully carry out their duties. The course will also help those who are looking to progress their career by moving into Management positions from present "hands on" technical duties.
